### MEANING OF IRIS TERMS

- SELF - is an iris with standards and falls of the same color and same intensity.  
BICOLOR - same color, but standards lighter than falls.  
NEGLECTA - is a purple bicolor.  
PLICATA - petals sanded, veined, stitched, or splashed with a deeper or different color.  
VARIEGATA - yellow standards, with falls of darker color or heavily veined.  
AMOENA - white standards, dark falls, sometimes veined or margined.

- - - -

Dicotoma or Vesper iris are new to most irisarians. These come from China and as they are grown on the thatched roofs, are also called Roof Iris. They bloom during the latter part of July and August and sometimes into September. Stalks bear from 60 to 225 jewel like blooms, at Vester time or tea time each day. Colors range deep purple, through the lavenders, to white and look like butterflies with open wings. With each order of \$2.00 or more, I will include four of these plants for 50¢. They are rare, so you can be the first in your neighborhood to have them.

### TERMS

CASH WITH ORDER - POSTAGE WILL BE PAID

ON ORDERS OVER \$2.00.

Some people believe Victory Gardens are of prime importance. I agree. But flowers are food for the soul and when have we ever needed food for the soul more than now.

Dear Friends:

Iris hobby is most intriguing. I started collecting named varieties of iris and then hybridizing. I joined the American Iris Society in 1927 and am still very much thrilled with each new variety, whether one of my own or from some other hybridizer. It is a hobby from which one never tires. One meets many charming friends through association with American Iris Society members.

Cost of membership is \$3.00 per year. You receive four bulletins, full of latest news of Irisdom. Membership card is admission to iris shows and Society's aid in giving shows. You may send remittance to me or direct to Mr. Howard R. Watkins, 821 Washington Loan & Trust Bldg., Washington, D. C.

Yours very truly,

*Mrs. Norman S. Horton*
